

2-bit dual supply level translator without direction control pin, open drain output

Datasheet - production data

Features

- 18 Mbps (max.) data rate when driven by a totem pole driver
- 6.8 Mbps (max.) data rate when driven by an open drain pole driver
- Bi-directional level translation without direction control pin
- Wide V_L voltage range of 1.65 to 3.6 V
- Wide V_{CC} voltage range of V_L to 5.5 V

- Power-down mode feature: when either supply is OFF, all I/Os are in high impedance
- Low quiescent current (max. 4 μA)
- Able to be driven by totem pole and open drain drivers
- 5.5 V tolerant Enable pin
- ESD performance on all pins: ±2 kV HBM
- Small package and footprint: QFN8 (1.4 x 1.2 x 0.55 mm) package

Applications

- Low-voltage system level translation
- · Mobile phones and other mobile devices
- I²C level translation
- UART level translation

ST2329B Description

1 Description

The ST2329B device is a 2-bit dual supply level translator which provides the level shifting capability to allow data transfer in a multi-voltage system. Externally applied voltages, V_{CC} and V_{L} , set the logic levels on either side of the device. It utilizes a transmission gate-based design that allows bi-directional level translation without a control pin.

The ST2329B device accepts V_L from 1.65 to 3.6 V and V_{CC} from 1.80 to 5.5 V, making it ideal for data transfer between low-voltage ASICs/PLD and higher voltage systems. This device has a tristate output mode which can be used to disable all I/Os.

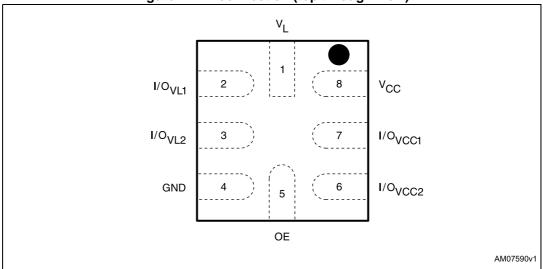

The ST2329B device supports power-down mode when V_{CC} is grounded/floating and the device is disabled via the OE pin.

Pin settings ST2329B

3 Device block diagrams

Figure 2. Block diagram

- 1. When OE is LOW, all I/Os are in high-impedance mode.
- 2. The ST2329BQTR has 2 channels. For simplicity, the diagram above shows only 1 channel.

Figure 3. Application block diagram

4 Supplementary notes

4.1 Driver requirements

The ST2329BQTR may be driven by an open drain or totem pole driver and the nature of the device output is "open drain". It must not be used to drive a pull-down resistor as the impedance of the output at HIGH state depends on the pull-up resistor placed at the I/Os.

As the device has pull-up resistors on both the I/O_{VCC} and I/O_{VL} ports, the user needs to ensure that the driver is able to sink the required amount of current. For example, if the settings are V_{CC} = 5.5 V, V_L = 4.3 V, and the pull-up resistor is 10 k Ω , then the driver must be able to sink at least (5.5 V / 10 k Ω) + (4.3 V / 10 k Ω) = 1 mA and still meet the V_{IL} requirements of the ST2329BQTR.

4.2 Load driving capability

To support the open drain system, the one-shot transistor is turned on only during high transition at the output side. When it drives a high state, after the one-shot transistor is turned off, only the pull-up resistor is able to maintain the state. In this case, the resistive load is not recommended.

4.3 Power-off feature

In some applications where it may be required to turn off one of the power supplies powering up the level translator, the user can turn off the V_{CC} only when the OE pin is low (device is disabled). There is no current consumption in V_L due to floating gates or other causes, and the I/Os are in a high-impedance state in this mode.

ST2329B Maximum rating

5 Maximum rating

Stressing the device above the rating listed in *Table 4: Absolute maximum ratings* may cause permanent damage to the device. These are stress ratings only, and operation of the device at these or any other conditions above those indicated in *Table 5: Recommended operating conditions* of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

8 Package mechanical data

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: www.st.com. ECOPACK is an ST trademark.

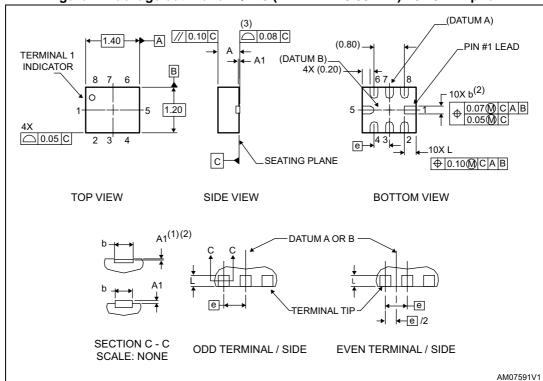

Figure 7. Package outline for QFN8 (1.4 x 1.2 x 0.55 mm) - 0.40 mm pitch

- 1. Dimension b applies to the metallized terminal and is measured between 0.10 and 0.20 mm from the terminal tip. If the terminal has the optional radius on the other end of the terminal, dimension b should not be measured in that radius area.
- 2. Applied only for terminals.
- 3. Bilateral coplanarity zone applies to the exposed heatsink slug as well as the terminals.
- 4. Dimensions and tolerancing conform to ASME Y14.5M 1994.

Table 15. Mechanical data for QFN8 (1.4 x 1.2 x 0.55 mm) - 0.40 mm pitch

Symbol		Note		
Symbol	Min.	Nom.	Max.	Note
А	0.50	0.55	0.60	
A1	0.00	-	0.05	
b	0.15	0.20	0.25	(1)
В	0	-	12°	(2)
е		0.40 BSC		
N		8		(3)
L	0.25	0.30	0.35	

- 1. Dimension b applies to the metallized terminal and is measured between 0.10 and 0.20 mm from the terminal tip. If the terminal has the optional radius on the other end of the terminal, dimension b should not be measured in that radius area.
- 2. All dimensions are in millimeters, B is in degrees.
- 3. N is the total number of terminals.

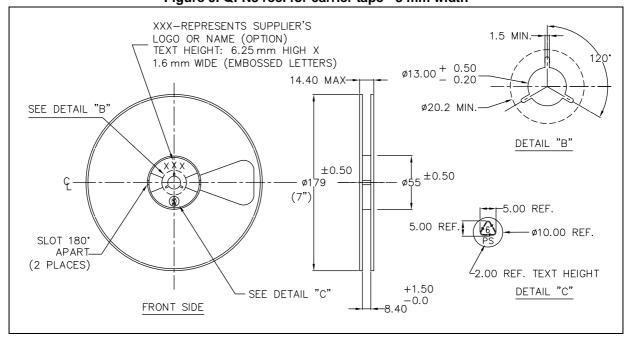

Figure 8. QFN8 carrier tape - 8 mm width

- 1. Measured from centerline of sprocket hole to centerline of pocket.
- 2. Cumulative tolerance of 10 sprocket holes is ± 0.20.
- 3. Measured from centerline of sprocket hole to centerline of pocket.
- 4. Other material available.
- 5. Typical SR of form tape max. 10° Ω /SR.
- 6. All dimensions are in millimeters unless otherwise stated.

Table 16. QFN8 carrier tape dimensions - 8 mm width

	Carrier tape					
Symbol	Ao	Во	Ko	F	P1	W
Dimensions	1.52 ± 0.05	1.52 ± 0.05	0.73 ± 0.05	3.50 ± 0.05	4.00 ± 0.10	8.00 ± 0.10

Revision history ST2329B

9 Revision history

Table 17. Document revision history

Date	Revision	Changes
25-Jun-2012	1	Initial release.
03-Aug-2012	2	Updated Section 6.2.1, Section 6.2.2, Table 10, Table 11, and Table 12, added carrier tape (Figure 8 and Table 16).
18-Feb-2013 3		Updated document status (production data). Minor corrections throughout document.

Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

ST PRODUCTS ARE NOT AUTHORIZED FOR USE IN WEAPONS. NOR ARE ST PRODUCTS DESIGNED OR AUTHORIZED FOR USE IN: (A) SAFETY CRITICAL APPLICATIONS SUCH AS LIFE SUPPORTING, ACTIVE IMPLANTED DEVICES OR SYSTEMS WITH PRODUCT FUNCTIONAL SAFETY REQUIREMENTS; (B) AERONAUTIC APPLICATIONS; (C) AUTOMOTIVE APPLICATIONS OR ENVIRONMENTS, AND/OR (D) AEROSPACE APPLICATIONS OR ENVIRONMENTS. WHERE ST PRODUCTS ARE NOT DESIGNED FOR SUCH USE, THE PURCHASER SHALL USE PRODUCTS AT PURCHASER'S SOLE RISK, EVEN IF ST HAS BEEN INFORMED IN WRITING OF SUCH USAGE, UNLESS A PRODUCT IS EXPRESSLY DESIGNATED BY ST AS BEING INTENDED FOR "AUTOMOTIVE, AUTOMOTIVE SAFETY OR MEDICAL" INDUSTRY DOMAINS ACCORDING TO ST PRODUCT DESIGN SPECIFICATIONS. PRODUCTS FORMALLY ESCC, QML OR JAN QUALIFIED ARE DEEMED SUITABLE FOR USE IN AEROSPACE BY THE CORRESPONDING GOVERNMENTAL AGENCY.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.
