## Ultra Low Profile 0805 Power Divider 50Ω to 50Ω

### Description

The PD0409J5050S2HF is a low profile, sub-miniature Wilkinson power divider in an easy to use surface mount package. The PD0409J5050S2HF is ideal for high volume manufacturing and delivers higher performances than traditional printed and lumped element solutions. The PD0409J5050S2HF is matched to 50 Ω and has a height profile of 0.5 mm which is ideal for high level integrations in the following markets: GSM, WCDMA, DVB-H (Europe) and Terrestrial TV.

The PD0409J5050S2HF does not include the resistive element and therefore, requires an external resistor for operation. The PD0409J5050S2HF is available on tape and reel for high volume manufacturing pick and place.

### Outline Drawing

## Typical Broadband Performance: 10 MHz. to 8.0GHz.

### Typical Performance: 300 MHz. to 1000 MHz.

## Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and Green standards and ready for Pb-free soldering processes. Pads are Gold plated with a Nickel barrier.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances. In addition, since the PD0409J5050S2HF is a Wilkinson power divider, an external 0603 100Ω resistor must be mounted in locations R1 as shown in the Figure below.
