

Circular Connectors Supporting TÜV and MIL spec.

H/MS Series

■ Features

1. Compatible with MIL spec. standard products
2. A ground circuit is provided in the TÜV approved connectors
3. Waterproof

The mated plug/receptacle combinations and un-mated receptacles are compliant to IP67F and IP68F ratings.

IP67: Left in water at a depth of 1 m for 30 minutes

IP68: Left in water at a depth of 2 m for 14 days

■ Performance

Items	Specifications	Conditions
1. Contact resistance	10SL, 20-29, 22-14: 5 mΩ max. 18-10, 20-15, 22-23: 3 mΩ max. 22-22, 24-10: 1 mΩ max.	Measured at DC 1 A
2. Insulation resistance	5,000 MΩ min.	Measured at DC 500 V
3. Withstanding voltage	No flashover or dielectric breakdown	AC 2,250 V for one minute
4. Vibration Resistance	No electrical discontinuity for 10 μs min.	10 to 500 Hz/cycle, full amplitude: 0.75 mm, with 98 m/s ² , 3 directions, 3 hours each 10 to 500 Hz/cycle, full amplitude: 0.75 mm, with 98 m/s ² , 3 axis directions, 3 hours each
5. Shock resistance	No electrical discontinuity for 10 μs min.	Acceleration: 490 m/s ² , duration: 11 ms, 3 axis directions, 3 cycles each
6. Mating Cycles	Contact resistance : Initial value x for 1.5 mΩ max.	500 times
7. Temperature cycle	Insulation resistance: a minimum of 500 MΩ	-55°C: 30 minutes → Normal temperature: 10 to 15 minutes → 125°C: 30 minutes → Normal temperature: 10 to 15 minutes, left for 5 cycles
8. Moisture resistance	Insulation resistance: a minimum of 50 MΩ (at high humidity min. 500 MΩ (when dry) min.	Temperature: 71°C, relative humidity: 95%, left for 336 hours
9. Waterproof	No water penetration into the connector.	Left in water at a depth of 1 m for 0.5 hours in the mated state.

Materials

Material		Finish	Remarks
Shell	Aluminum alloy (Zinc alloy: H/MS3108B plug cord tube)	Black chromate treatment	_____
Insulator	PPS resin, PBT resin, or silicone rubber	Black	UL94V-0 (Excluding silicone rubber)
Contact	Copper alloy	Silver plating	_____
Bushing	Acrylonitrile-butadiene rubber (Chloroprene rubber: H/MS08A plug)	Black	_____

Ordering information

● Plug and receptacle

H/MSA 3102 A 18 - 10 P X - D - T (01)

① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑪

● Clamp

H/MSA 3057 - 4A (01)

① ② ⑩ ⑪

① Model name: H/MS Series.
② Shape: Indicates the shape of the connector. 3102 : Receptacle 3106 : Straight plug 3108 : Right angle shaped plug 08: Low-profile, right angle shaped plug 3057 : Cord clamp
③ Structure: Indicates the structure of the connector. A: Integrated shell B: Separated shell
④ Shell size: This is the diameter of the screw (inches) at the termination end multiplied by the constant of 16. (Example: The shell size of 18 is calculated by $1 \frac{1}{8} \times 16 = 18$.)
⑤ Contact arrangement: See pages 10 and 11 for details on contact arrangement.
⑥ Contact form: Indicates the termination style. P : Soldered, male contact S : Soldered, female contact PC: Crimped, male contact SC: Crimped, female contact
⑦ Variations of insert position: The letters W, X, Y, or Z are used for any changes in the insert position from that of the standard type.
⑧ Ground contact number: Notes the grounded contact for TÜV approved products. The ground contact position corresponds to contacts C, D, or G, and varies depending on shell size. Part numbers without this symbol indicate that the part does not include a ground contact.
⑨ TÜV approved product: TÜV approved products that are compliant with DIN VDE 0627.
⑩ Clamp size: Indicates both clamp size and structure.
⑪ Other specifications: A two-digit number such as (01) or (02) is added to indicate other specifications.

Connector combinations

- (Remarks)
1. Illustration represents connectors for flexible conduit and cabtire cable as a reference example.
 2. The standard and TÜV approved products are compatible with each other.
When using the TÜV approved products for TÜV applications, make sure to use both TÜV approved plugs and receptacles together.

H/MS3106A22-□□(76)	ACS**RL-MS22F	ACA**RL-MS22F	YDO 22**	YLO 22*
H/MS3106A24-□□(73)	ACS**CA2428	—	YDC 24** (with O-ring)	—
H/MS3108B24-□□(73)			YDC 24**	
H/MS3106A24-□□(76)	ACS**RL-MS24F	ACA**RL-MS24F	YDO 24**	YLO 24*

(Remarks) 1. □□ : Indicates contact arrangement/count.

2. **: The values differ depending on the cable used.

◆ Contact arrangement and electrical performance

Shell size	10SL		18	20	
	4	3	10	15	29
Contact arrangement					
Number of contacts	2	3	4	7	17
Withstanding voltage	AC 1,000 V for one minute		AC 2,000 V for one minute		
Current capacity	13A(24.5A)	13A(34.5A)	23A(76.2A)	23A(105.7A)	13A(44.2A)
Insulation resistance	5,000 MΩ min. at 500V DC				
Contact resistance	5 mΩ max.		3 mΩ max.		5 mΩ max.
Inner diameter of solder pot	φ1.8		φ2.9		φ1.8
Preliminary soldering	Not necessary		Needed		Not necessary

Shell size	22			24
	14	22	23	10
Contact arrangement				
Number of contacts	19	4	8	7
Withstanding voltage	AC 2,000 V for one minute			
Current capacity	13A(49.4A)	46A(152.5A)	23A(100.4A)	46A(211.5A)
Insulation resistance	5,000 MΩ min. at 500 V DC			
Contact resistance	5 mΩ max.	1 mΩ max.	3 mΩ max.	1 mΩ max.
Inner diameter of solder pot	φ1.8	φ5.3	φ2.9	φ5.3
Preliminary soldering	Not necessary	Needed		

Remarks

- Figure shows the receptacle contact arrangement as viewed from the interface mating side (plug's socket insert side).
- Withstanding voltages are derived from test voltages
- Current capacities are shown in a value per contact. The number in () indicates the connector's total capacity.
- Contact resistances are shown in a value when measured at DC 1 A.
- Please contact us for more information.

◆ Major specifications of TÜV approved products

● Applicable German standard: DIN VDE0627 (connector)

Shell size	10SL			18				22				24			
Contact arrangement	3			10				22				10			
															
Number of contacts	3			4				4				7			
Ground contact No.	C			D				D				G			
AC/DC rated voltage (V)	200			500		250		500		250		250			
Rated current (A)	7	10	13	17	23	17	23	23	35	46	23	35	46	23	46
Wire size (mm ²)	0.5	0.75	1.25	2	3	2	3	3.5	5.5	8	3.5	5.5	8	3.5	5.5
Degree of Pollution	3			2		3		2		3		2			
Conducting voltage category	Ⅲ			Ⅱ		Ⅲ		Ⅱ		Ⅲ		Ⅱ			
Inner diameter of solder pot (mm)	φ1.8			φ2.6				φ4.5				Plug: φ3.6 Receptacle: φ5.3			

Remarks

- Figure shows the receptacle contact arrangement as viewed from the interface mating side (plug's socket insert side).
- Current capacities are shown in a value per contact.
- The contact numbers with a mark "⊙" have contacts that are grounded to the outer shell, except for receptacles that are size 24-10.
- For the receptacles that are size 20-10, the ground contact (contact No.: G) does not ground with the outer shell. Please use these connectors after grounding the outer shell of the connector with the corresponding contact No.
- The degree of pollution and conducting voltage categories refer to the environmental condition in which a DIN VDE0110 (insulation coordination for the electric appliances in a constant voltage facility) electric appliance is used, and to the class of over voltage in the electric appliance.
- Performance values for other than those shown above are the same as those of the general H/MS series.

◆ Usage Recommendations

- The power to the circuit should always be off before mating/unmating a connector.
- Always use a female connector for the power side of the circuit; this will prevent the likelihood of electric shocks.
- Be sure to fully tighten the lock mechanism of the connectors.
- Connector performance features such as cable clamping force, cable rotation force, or waterproof performance may differ depending on the cable construction. Please make sure all specifications are met before assembly.
- This product uses silver-plated contacts. Please be aware that silver easily reacts to sulfur gases, causing discoloration or degradation when exposed to certain environmental conditions as shown below. These conditions include areas with:
 - A large amount of dust and dirt
 - High density of sulfur dioxide gas, hydrogen sulfide gas, nitrogen dioxide gas, or other gas (Emission gases from vehicles and factories, etc.)
 - Highly fluctuating temperatures, such as close to a heating apparatus
 In addition, it is recommended to store the products in their original packaging or similar state in order to prevent discoloration.
 - Temperature: -10 to +60°C, relative humidity: 80% or lower (An environment where temperature and relative humidity are constant and there is less temperature difference is recommended.)
 - Please use the products within six months after delivery.
 (For the products in which the storage period is expired, please confirm the ease of soldering for your application beforehand.)
