### General Description

The SP78XX series are monolithic integrated circuits designed as fixed-voltage regulators for a wide variety of applications including local, on-card regulation.

This series of regulators are complete with internal current limiting, thermal shutdown protection, and safe-area compensation which make them virtually immune from output overload. If adequate heat sinking is provided, these regulators can deliver output currents up to 1.0A.

The SP78XX series are available in two standard plastic packages: TO-220 and TO-252.

## Absolute Maximum Ratings (Note 1)

Parameter	Symbol	Value	Unit
Input Voltage	$V_{IN}$	20	V
Lead Temperature (Soldering, 10sec)		300	°C
Power Dissipation	$P_D$	Internally Limited	
Storage Temperature Range	$T_{STG}$	-65 to 150	°C
ESD (Machine Model)	ESD	500	V

Note 1: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.
