MADE FOR THE TRADE!™

SAFETY
PRODUCTS

SAFETY PRODUCTS

Safety is Priority One, whether it's the contractor responsible for a work site, an electrician working with 120V in a basement circuit box, or working with 440V on a bus bar. Working indoors or outdoors, everyone wants to go home in the same condition they came to work that day, and they want to be able to do that day after day, year after year.

Greenlee embraces safety and offers our comprehensive line of ANSI compliant high quality safety gear, designed to satisfy your personal protective equipment needs. Our line of rugged safety wear provides not only improved safety on the job, but also comfort, convenience and style!

High visibility vests with convenient pockets help you to stand out at the work site. Zippers, cloth and reflective materials are made to perform and last.

ANSI compliant safety glasses look good. Available varieties block out sunshine, enhance light on overcast days, or offer bi-focal lenses to help see your work without having to carry an extra pair of "cheaters".

We've redesigned and expanded our standard glove offering to give more padding, more protection, and improved durability. There are now varieties to enhance your grip or to give full use of fingertips for the very best dexterity.

Knee pads are offered that make it easier to swivel on your knees, or another variety that provides improved grip if that's what is needed.

In the hot summer months, we now offer stylish cooling products to wear under your hard hat, or if no hard hat is needed, we offer a full bandana as well. These cooling products are easy to use and keep you cool for hours at a time.

For those in cold weather climates, we offer Thinsulate™* winter gloves, a very warm balaclava to wear like a hood or face-mask, and shoe traction attachments to help your feet have a better grip in snow and ice.

*Thinsulate™ is a trademark of the 3M Corporation.

HIGH VISIBILITY

SAFETY VESTS

Tradesman
2-Tone

Tradesman

Surveyor
