High Density BNC Connectors

**SMPTE
Compliant**

Amphenol® RF
Global RF Solutions

Amphenol RF, the inventor of the BNC, introduces the High Density BNC family of connectors. HD BNC delivers true 75 ohm performance in a footprint 51% smaller than traditional BNC connectors, allowing four times the density. Engineered to enhance electrical and mechanical performance, the HD BNC connector features the trusted, push and turn interface of a traditional BNC, providing tactile feedback and a positive lock for quick and guaranteed mating. Using the same cable prep and termination specifications of legacy broadcast connectors makes adopting HD BNC seamless.

Features and Benefits

- **High Density Solution** - Allows four times as many interconnects as the BNC.
51% smaller than the BNC
39% smaller than the Mini-BNC
- **Bayonet Coupling** - Provides a positive lock and allows for quick and easy connect and disconnect.
- **True 75 Ohm Impedance** - Higher performance, unmatched reliability.
- **Fits traditional Broadcast Cables** - Belden 1694 &1855

Applications

Broadcast
Digital Video – HDTV
Telco Central Office
Instrumentation
DS3/DS4
Custom Cable Assemblies
Network Routing & Switching
Military/Aerospace
Medical Equipment
Satellite Headends

Specifications

Electrical

Impedance	75 Ω
Frequency Range	0-6 GHz
Voltage Rating	170 VRMS
Dielectric Withstanding Voltage	500 volts
Return Loss	30 dB @ 3 GHz
Contact Resistance	Center contact: 5 m Ω Outer contact: 2.5 m Ω
Insulation Resistance	10,000 M Ω minimum
Date Rate	3 Gbps or higher

Mechanical

Mating	Bayonet Positive Locking
Braid/Jacket Cable Affixment	Hex crimp
Center Conductor Cable Affixment	Solder / Crimp
Contact Captivation	All types unless noted otherwise
Connector Durability	500 mating cycles minimum

Material

Male Contact	Brass, AmorPHous (gold) Plating
Female Contact	Beryllium copper, AmorPHous (gold) Plating
Outer Contacts	Beryllium copper, Nickel Plating
Bodies and Hardware	Brass, Nickel Plating

Meets SMPTE 292M & 424M standards
