SAW Duplexer

Application : Band5 / BC0 Duplexer

P/N : FSDCSQ8T881MK2E4
D5DA881M5K2E4

Version : 3.6

Date : February 9th, 2022

Features

- Size : 1.8 mm x 1.4 mm
- High Power Durability (+30.0 dBm)

* Pb Free Part

Notice

- Please conduct validation and verification of our products in actual condition of mounting and operating environment before using our products.
- The products listed in this specification are intended for use in general electronic equipment (e.g., AV equipment, OA equipment, home electric appliances, office equipment, information and communication equipment including, without limitation, mobile phone, and PC). Please be sure to contact TAIYO YUDEN for further information before using the products for any equipment which may directly cause loss of human life or bodily injury (e.g., transportation equipment including, without limitation, automotive powertrain control system, train control system, and ship control system, traffic signal equipment, disaster prevention equipment, medical equipment classified as Class I, II or III by IMDRF, highly public information network equipment including, without limitation, telephone exchange, and base station).
Please do not incorporate our products into any equipment requiring high levels of safety and/or reliability (e.g., aerospace equipment, aviation equipment, medical equipment classified as Class IV by IMDRF, nuclear control equipment, undersea equipment, military equipment).
When our products are used even for high safety and/or reliability-required devices or circuits of general electronic equipment, it is strongly recommended to perform a thorough safety evaluation prior to use of our products and to install a protection circuit as necessary.
Please note that unless you obtain prior written consent of TAIYO YUDEN, TAIYO YUDEN shall not be in any way responsible for any damages incurred by you or third parties arising from use of the products listed in this specification for any equipment requiring inquiry to TAIYO YUDEN or prohibited for use by TAIYO YUDEN as described above.
- Information contained in this specification is intended to convey examples of typical performances and/or applications of our products and is not intended to make any warranty with respect to the intellectual property rights or any other related rights of TAIYO YUDEN or any third parties nor grant any license under such rights.
- Please note that the scope of warranty for our products is limited to the delivered our products themselves and TAIYO YUDEN shall not be in any way responsible for any damages resulting from a fault or defect in our products. Notwithstanding the foregoing, if there is a written agreement (e.g., supply and purchase agreement, quality assurance agreement) signed by TAIYO YUDEN and your company, TAIYO YUDEN will warrant our products in accordance with such agreement.
- The contents of this specification are applicable to our products which are purchased from our sales offices or authorized distributors (hereinafter "TAIYO YUDEN's official sales channel"). Please note that the contents of this specification are not applicable to our products purchased from any seller other than TAIYO YUDEN's official sales channel.
- Caution for Export
Some of our products listed in this specification may require specific procedures for export according to "U.S. Export Administration Regulations", "Foreign Exchange and Foreign Trade Control Law" of Japan, and other applicable regulations. Should you have any questions on this matter, please contact our sales staff.

Recommended Printed Circuit Board Layout for 1814 sized Band 5 Duplexer

For 1814 size Band 5 duplexer (D5DA881M5K2E4) ,recommended PCB Layout are shown in Fig.1 and 2.

Devices location, ground pattern layout , PCB layer thickness and through-holes' location around duplexer are important for duplexer's characteristics, especially isolation.

Layer thickness (PCB structure) is described in the next page .

0603 size inductor is mounted for matching.

Fig. 1. Recommended Printed Circuit Board Layout.

Fig. 2. Matching Circuit

Printed Circuit Board Structure

Fig. 3 and Table 1 show recommended PCB structure.
Ground pattern parasitic inductance depends on layer thickness.
Duplexer isolation is very sensitive to ground pattern parasitic inductance variation.
Test results of this PCB are shown in page 6,7 and 8.

Fig. 3. Recommended PCB Structure

Description	Specification	Material
Dielectric Core material	Thickness: 200 µ m	Dielectric Constant typical:
		3.4 @ 2GHz
Dielectric Prepreg	Thickness: 100 µ m (L1-L2,L3-L4)	Dielectric Constant typical:
		3.4 @ 2GHz
Cu thickness (layers 1 to 4)	18 µ m	
Buried via size	100 µ m diameter
