

Anaren Integrated Radio (AIR)

Low-power RF modules, firmware & development tools that make it easy to 'go wireless'

1101 Series

The A1101R08C is a high-performance, ETSI-compliant connectorized radio module that incorporates the Texas Instruments CC1101 transceiver, all in the industry's smallest package: 9 x 12 x 2.5mm.

A1101R08C

Features

- Frequency range: 868-870 MHz
- ETSI-compliant, shielded package
- Digital RSSI output
- Programmable output power up to +10dBm
- High sensitivity (1.2 kBaud, 1% packet error rate)
-112 dBm at 869 MHz (compliant to ETSI)
- Ultra-small package size: 9 x 12 x 2.5mm
- Industry-standard U.FL connector
- LGA footprint
- RoHS compliant
- Operating temperature -40 to +85°C
- Impedance-controlled, multi-layer PCB
- 1.8 to 3.6 VDC
- Low current consumption (15 mA in RX, 1.2 kBaud, 868 MHz)
- 200 nA sleep mode current consumption
- Efficient SPI interface; all registers can be programmed with one "burst" transfer
- Available in tape & reel and matrix tray
- Module weight approximately 0.4 grams

Benefits

- Minimal RF engineering experience necessary
- No additional "Intentional Radiator" certification required (ETSI EN 300 220)
- Minimal real estate required
- Easily implemented on a two layer PCB
- No additional harmonic filtering required
- 100% RF-tested in production
- Common footprint for similar products in family
- No additional DC decoupling required
- Integrated analog temperature sensor
- Excellent receiver selectivity and blocking performance
- Suitable for frequency hopping systems, thanks to a fast-settling frequency synthesizer with 90 μ s settling time
- Impedance-matched balun for optimized efficiency
- Support for asynchronous and synchronous serial receive/transmit mode for backwards compatibility with existing radio communication protocols

PLEASE NOTE: Additional information on the Texas Instruments CC1101 device can be found in the company's latest datasheet release at <http://www.ti.com>

Anaren Integrated Radio (AIR)

Low-power RF modules, firmware & development tools that make it easy to 'go wireless'

Product overview

The A1101R08C is a high-performance, ETSI-compliant connectorized radio module that incorporates the Texas Instruments CC1101 transceiver chip in the industry's smallest package (9 x 12 x 2.5mm) and is compatible with all TI-approved software stacks.

With an LGA pad footprint and industry-standard U.FL button connector receptacle, this module is designed to effortlessly integrate into a wide range of applications, including: industrial control, building automation, low-power wireless sensor networks, lighting control, and automated meter reading.

The A1101R08C has an RoHS-compliant ENIG finish and is packaged on tape & reel or in matrix trays for high-volume automated manufacturing.

Pin diagram

Viewed from top side

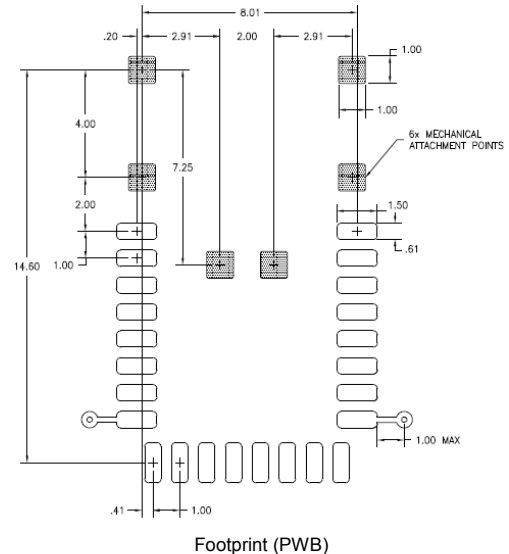

NC = "NO Connection"
Pin is NOT connected internally.

DNC = "Do Not Connect"
Pin reserved for internal use, ensure mating footprint pads are **isolated**.

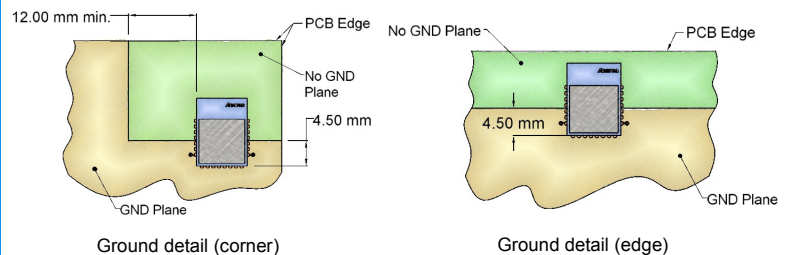

GND = "Ground"
Connect the maximum number possible (minimum **one** for proper operation).

Layout Information

Top 2 pads optional for compatibility with other modules. Refer to User's Manual for additional layout guidelines. Dimensions in mm.
