

Ultra Low-profile Interface Connectors with 2.0 mm Mounting Height

LX Series

Overview

LX Series is a super low profile interface connector with sequential mating design and friction lock, which has been developed for low profile mobile terminals.

This connector features ESD problem prevention in 0.5 mm terminal pitch and 2.0 mm small and low profile design, which makes it suitable to small mobile devices.

Features

1. Low profile on the PCB

When mounted on the PCB surface the receptacle height is 2.0 mm.(Fig.1)

2. Strong Construction

Use of metal shell guarantees that fully mated connectors will withstand 30 N max. force applied on the plug in any direction.(Fig.2)

3. High contact reliability

Bellows contact with long mating stroke provides highly reliable mating as well as soft insertion feeling.

Mating durability is up to 5,000 times long.

4. Sequenced contact mating

The protection of the circuit is assured by having the 2 contact at each end of the receptacle are longer by 0.5 mm, with electrical wipe of 1.45 mm. Location of the circuit protection contacts can be changed as required.

Remaining contacts electrical wipe is 0.95 mm.

5. Incorrect Insertion Prevention

Connectors will not be damaged when angled or reverse plug insertion is attempted.(Fig.3)

6. Safety plug release

Plug will release when an excessive pull force is applied to the cable.

7. RoHS Compliant

All materials and substances used to produce this product comply with RoHS standards.

Applications

DSC, PDA, thin electronic equipment, mobile phones and other portable devices requiring high durability interface connectors.
