#### **Data Sheet**

# **Digital Storage Oscilloscopes**

#### 2550 Series

The 2550 series digital storage oscilloscopes provide high performance and value in 2-channel and 4-channel configurations. With bandwidth from 70 MHz to 300 MHz and 2 GSa/s sample rates, these oscilloscopes offer 24 kpts/Ch waveform memory, 32 automatic measurements, and advanced triggering capabilities including math functions. Engineered to allow you to see more of your signal under test, the 2550 series' widescreen 7" TFT display offers a significantly larger viewing area than typical economy oscilloscopes (5.7").

Maximize productivity with PC connectivity via LAN and USB. The downloadable PC software lets you easily capture, save, and analyze measurement results. All oscilloscope parameters can be controlled via a PC without the need for programming.

Additionally, these oscilloscopes can be integrated with AWGs using B&K Precision's waveform editing software, WaveXpress. WaveXpress allows users to easily modify waveforms downloaded from the scope and can also be used for analysis of deep memory acquisitions.

Educators who want to teach waveform measurement fundamentals can benefit from the ability to disable the Auto set button, a function that automatically sets up the scope to display a signal.

The 2550 series oscilloscopes are ideal for applications in design and debug, service and repair, and education.

#### **Features & Benefits**

- Bandwidth up to 300 MHz
- 2 GSa/s sample rate
- 4-channel acquisition (on select models)
- Large 7" widescreen color display
- FFT including four additional math functions - Add, Subtract, Multiply, and Divide
- 32 automatic measurements
- 50  $\Omega$  input coupling (200 MHz and 300 MHz models)
- Standard LAN (supports SCPI) and USB device port (USBTMC compliant)
- Front and rear panel USB host port for saving and recalling waveform setups, data, and screenshots on a USB flash drive
- Software provided for remote PC control
- Advanced tools include digital filters with adjustable limits, pass/fail testing and waveform recorder mode
- Multi-language user interface and context sensitive help

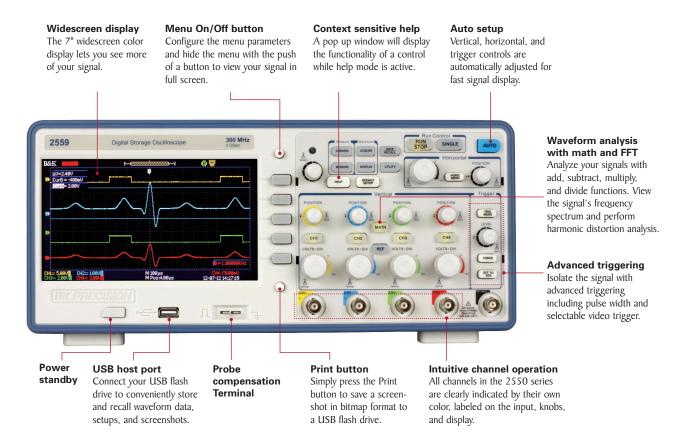

| Model     | 2552 | 2553 | 2554    | 2555 | 2556    | 2557 | 2558    | 2559 |
|-----------|------|------|---------|------|---------|------|---------|------|
| Bandwidth | 70 1 | MHz  | 100 MHz |      | 200 MHz |      | 300 MHz |      |
| Channels  | 2    | 4    | 2       | 4    | 2       | 4    | 2       | 4    |

#### **Front panel**

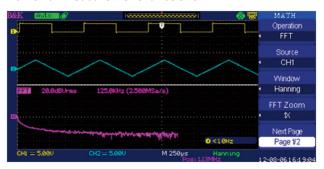

#### Rear panel

#### The tools you need

#### Powerful measurement functions

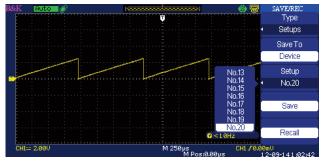

Display and measure the input signal's frequency spectrum. Select one of the 4 FFT windows: Rectangular, Hanning, Hamming, and Blackman. Use cursors to measure the spectral component's magnitude and frequency.

#### Waveform recorder

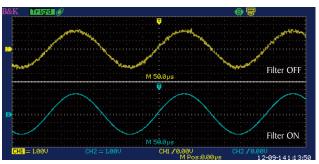

Monitor and analyze long-term signal behavior by recording data continuously over an extensive period of time and playing it back for post acquisition analysis. Data is recorded in a sequence of up to 2500 frames.

#### Large internal storage

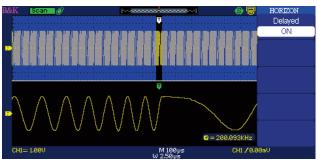

Minimize debug time by saving and recalling setups and waveforms from internal memory. Save and recall up to 20 different oscilloscope setups and 20 different waveforms.

#### **Digital filtering**

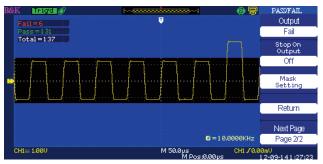

Filter out unwanted signal components such as various types of noise with built-in digital filters. Choose from Low-Pass, High-Pass, Band-Pass, and Band-Stop filters.

#### Delayed sweep/zoom

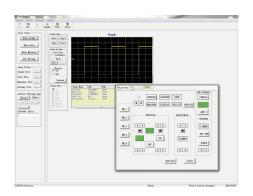

Use the oscilloscope's delayed sweep feature to zoom in a particular area of a signal in real time while viewing the entire captured waveform simultaneously.

#### Pass/Fail testing

Generate user-defined pass/fail limits to quickly identify go/no go test results.

#### **PC** connectivity

PC software is provided (free download at B&K Precision's website at www.bkprecision.com) for seamless integration between the oscilloscope and PC. Capture and transfer waveforms, screen images, setups and measurement results to a Windows PC via the USB device port on the back of the instrument. A USB host port on the front and rear allows for quick and easy screen saving.

### High bandwidth passive oscilloscope probes

PR150B

PR250B & PR500B

Avoid limiting the bandwidth of your measurement system. All 2550 series models come standard with high bandwidth, slimline passive probes (one per channel) to help you get the most out of your scope.

#### **Features**

- Slim, stylish body
- Snap-locking sprung hook
- Easily replaceable tip
- Large accessory set
- Meets IEC 61010-031 CATII
- RoHS compliant

| Model | Included Probes                                      |
|-------|------------------------------------------------------|
| 2552  | two 150 MHz bandwidth, x1/x10 probes (model PR150B)  |
| 2553  | four 150 MHz bandwidth, x1/x10 probes (model PR150B) |
| 2554  | two 150 MHz bandwidth, x1/x10 probes (model PR150B)  |
| 2555  | four 150 MHz bandwidth, x1/x10 probes (model PR150B) |
| 2556  | two 250 MHz bandwidth, x10 probes (model PR250B)     |
| 2557  | four 250 MHz bandwidth, x10 probes (model PR250B)    |
| 2558  | two 500 MHz bandwidth, x10 probes (model PR500B)     |
| 2559  | four 500 MHz bandwidth, x10 probes (model PR500B)    |

5 www.bkprecision.com

Notes:
(1) On 4-Ch models, Ch1 and Ch2 are interleaved, and Ch3 and Ch4 are interleaved. Half channel operation means that only Ch1 or Ch2 and/or only Ch3 or Ch4 is active.
(2) When timebase is 25 ns or faster and maximum data depth mode is enabled.

| Specifications                                                                               | 2552                                                                                                                                                                        | 2553                                                                                                                                                                                                    | 2554                                                                  | 2555                | 2556                               | 2557              | 2558            | 2559        |  |  |  |  |
