

206-0001-02 - Through Hole Prototyping Shield for Arduino Mega with Components and Free Breadboard

Through Hole Prototyping Shield for Arduino Mega with Components and Free Breadboard

Perfect for prototyping circuit using through hole components or adding Schmartboard SMT to DIP adapters to prototype surface mount components. The through hole grid is Schmartboard signature offset that allows greater flexibility than standard through hole boards. Included are all of the required components. We have also included a free 170 tie point breadboard with an adhesive back which can be used to create temporary circuits.
