

CAN-Bus Common Mode Chokes

Current compensated surface mount common mode chokes for controller area networks (CAN-Bus) in automotive, industrial and medical applications.

Features:

- Surface Mount
- Accurate current matching capability over a broad range of inductance values
- Sector wound coils at 25 & 51 μH to filter differential mode noise from the data signal.
- Low distortion
- Custom designs possible
- Smaller (1812) size parts are also available.

Applications:

- Automotive controller area network systems
- Industrial controls controller area network systems
- Medical monitoring systems
- Filtering common mode EMI on high speed differential lines such as network and telecom applications
