# THICK-FILM CHIP RESISTOR

SAMSUNG  
ELECTRO-MECHANICS

## We, Samsung, declare that our component Chip Resistor is produced in accordance with EU RoHS directive.

### 1. RoHS Compliance and restriction of Br

The following restricted materials are not used in packaging materials as well as products in compliance with the law and restriction.

- Cd, Pb, Hg, Cr6+, As, Br and the compounds, PCB, asbestos
- Bromic materials : PBBs, PBBOs, PBDO, PBDE, PBB

### 2. No use of materials breaking Ozone layer

The following ODS materials are not used in our fabrication process.

- ODS material : Freon, Haron, 1-1-1 TCE, CCl4, HCFC

If you want more detailed Information, Please Visit Samsung Electro-mechanics Website

# Operation Notes

## Applications

- Chip resistors are designed for general electronic devices such as home appliances, computer, mobile communications, digital circuit, etc. If you require our products with high reliability-performing at more than 125°C or below -55°C - for medical equipments, aircrafts, high speed machines, military usage, and items that can affect human life or if you need to use in specific conditions (corrosive gas atmosphere like H<sub>2</sub>S etc.), please contact us beforehand.
- Normal operation temperature ranges : -55°C ~+155°C
- Others (small sizes and flat type arrays) : -55°C ~+125°C
- Although resistor body is coated, sharp excessive impact should be avoided to prevent damages and adverse effects on characteristics (resistor value, open circuited, T.C.R.).

## Mounting

Please give more attention not to press the chip owing to the nozzle's improper height when it is mounted on PCB. (Excessive pressure may cause exterior damage, change in resistance, circuit open, etc.)

## Safety precautions

- These products are designed and produced for applying to the ordinary electronic equipments. (AV equipment, OA equipment, Telecommunication equipment, etc)
- Consult with our sales department before applying in the devices that require extremely high reliability such as medical equipments, transport equipments, aircrafts /spacecrafts, nuclear power controllers, fuel controllers, car equipments including car accessories and other safety devices.
- Following special environments, and such environmental conditions may affect the performance of the product. Please verify the performance and reliability thoroughly prior to use.
  - a) Using in various type of Liquid including water, oil, organic solvent and other chemicals.
  - b) Using in the places where the products are exposed to direct sunlight, sea wind, corrosive gases (including Cl, H<sub>2</sub>S, NH<sub>3</sub>, SO<sub>2</sub>, NO<sub>2</sub>), static electricity, electromagnetic waves and dusty air.
  - c) Using close to heat generating components or other flammable items.
  - d) Using in the places that is sealed or coated with resins or other coating materials after soldering.
  - e) Using in places subject to dew condensation.
- These products are not radiation resistant.
- The company is not responsible for any problems resulting from using of the products under the conditions not recommended herein.
- The company should notify any safety issues of the products to the customer. And the safety of the products should be monitored by the customer periodically.

## Storage

To maintain proper quality of chip components, the following precautions are required for storage environment, method and period.

- Storage Environment
  - Make sure that the ambient temperature is within 5°C ~40°C and the ambient humidity is within 20~70%RH.
  - Chip components may be deformed, if the temperature of packaged components exceeds 40°C .
  - Do not store where the soldering properties can be deteriorated by harmful gas such as sulphurous gas, chlorine gas, etc.
  - Bulk packed chip components should be used as soon as the seal is opened, thus preventing the solderability from deteriorating.
  - The remaining unused chips should be put in the original bag and sealed again or store in a desiccator containing a desiccating agent.
- Storage Time Period
  - Stored chip components should be used within 6 months after receiving the components. If 6 months or more have elapsed, please check the solderability before actually using.

## Cleaning

After Soldering Cleaning, soldering flux & Ionic cleaning liquid should be avoided on product.

If any possibility on product, please take a test before usage.

## Caution for Chip Resistor Separation from PCB.

Chip resistor installation on PCB is a similar phenomenon on a chocolate chip on top of a cake. PCB has enough flexibility on outer force but Chip resistor can be defected without any bending. (By chip resistor use of Ceramic, solder, metal) Therefore, when separating a Chip resistor from a PCB, beware of any crack on the chip.

## Others

- Manual work
  - Whenever separating chip resistor from PCB, do not re-use the chip resistor for circuit safety.
  - Electrical specification of chip resistors can be changed by soldering iron after separation.
  - Re-use of separated chip resistor should be prohibited.
- Do not use more than rated voltage. (Please check the contents of each product)

## Example of Land Pattern Design

- When designing P.C.B, the shape and size of the solder lands must allow a proper amount of solder to form under the resistor. The amount of solder formed at the end terminations has direct effect on the possibility of chip crack. The more the amount of solder and stress, the more the possibilities of chip crack.

## For Chip Type

### • Reflow Soldering(RC, RCA, RCM, RUT)

Type	A	B	2A+B	C
0402	0.17	0.20	0.54	0.18
0603	0.37	0.28	1.02	0.29

# Recommended Soldering Conditions

## Abstract

- There are 3 soldering methods.
  - Flow(wave) soldering.
  - Reflow soldering. (Reflow soldering is broadly divided into the total heating method and local heating method.)
  - Iron soldering.

Since Chip resistors come into direct contact with melted solder during soldering, it is exposed to potential mechanical stress caused by the sudden temperature change. The chip resistors may also be subject to silver migration and flux contamination.

## Flow(wave) Soldering

- Features

There are two types of soldering methods in flow(wave) soldering. One is single wave soldering, and the other is a double waves soldering. However, double waves soldering is mainly used. This method is designed for continuous and multiple dipping process by using primary and secondary wave, having completely different waveforms and characteristics.

With the primary wave, a comparatively strong jet flow is used to remove the flux gas and to solder.

With the secondary wave, it is used to remove excessive solder.

With the primary wave, the solder flows into a very small gap between components and air bubbles remaining on the soldered joint are removed.

With the secondary wave, the peel back is used to prevent bridging.

- Preheating

If a chip component is heated suddenly during soldering, it may crack by the thermal shock caused by the temperature difference between the surface and the inside of the chip. To prevent this, a full preheating is necessary. In case of wave soldering, the temperature difference between solder and surface of the component should be kept within 150°C. Also when cooling is done by dipping into solvent, care should be taken to keep the temperature difference within 150°C.

- Standard Soldering Condition

Soldering must be carried out without exceeding the approved soldering temperature and time shown within the shaded area of the graph at right. An excessively long soldering time or high soldering temperature results in leaching of outer terminations. When a PCB is warped, mechanical stress applied to the chip will be increased and might cause chip crack, especially if there is a big amount of solder on the chip. So, care should be taken not to use excessive amount of solder on the PCB.

For the flow(wave) soldering, the solder amount can be controlled by land size.

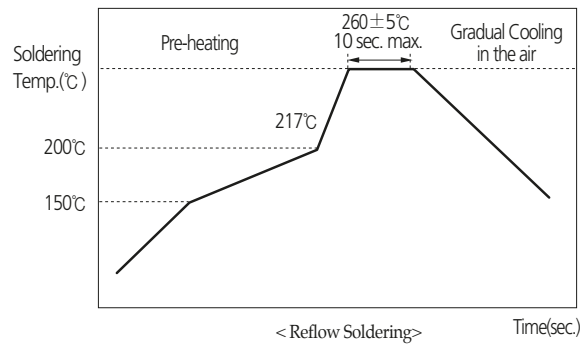

## Reflow Soldering

### • Pre-heating and cooling

In the reflow soldering method, a full pre-heating at the proper temperature is necessary to dry and activate solder paste. Tomb-stoning can be reduced by preheating at 150~180°C for more than 1 minute. Also when cooling is done by dipping into solvent, care should be taken to keep the temperature difference within 150°C.

### • Standard Reflow Soldering Condition

Soldering must be carried out without exceeding the approved soldering temperature and time shown within the shaded area of the right graph. This prevents the terminations from leaching and characteristics from deteriorating. When soldering is repeated, the allowed time is the accumulated time.

### • Standard solder amount

When a PCB is warped, mechanical stress applied to the chip should be reduced, and to do so, care should be taken not to use excessive amount of solder on the PCB. In the case of the reflow method, the thickness of the coated solder paste is controlled to prevent excessive solder. The thickness of solder paste should be 100~300µm.

### • Tombstoning and Prevention

When reflow soldering, or especially vapor phase soldering (VPS), small chip components of less than RC3216 type may break away from solder and stand on end. This is commonly known as tombstoning or the Manhattan phenomenon.

### - Preventing tombstoning

Keep land size as small as possible.

Keep the pre-heating conditions properly

(Pre-heating temperature : 150 ~ 180°, Pre-heating time : more than 1 min.)

Keep the solder paste quantity not too much and uniform for every lands.

Keep the position of chips properly.

At around the soldering temperature, keep minimum difference of the temperature between the electrodes of a chip.

## Iron Soldering

When using a soldering iron or any other soldering operation, the permissible temperature and time should not exceed that of the reflow soldering. In order to prevent the external terminations from leaching and characteristics from deteriorating, the tip of the soldering iron should not touch the chip component (ceramic element, resin case, etc.). Soldering with a soldering iron and correcting with a soldering iron can be performed right under following conditions.

Item	Condition
Temperature at tip	350°C Max.
Soldering iron output	20-Watt Max.
End of soldering iron	∅ 3mm Max.
Note	Do not directly touch the chip by the tip of the iron.

## General Structure of the Chip Resistor

No.	Name	Main Substance
(a)	Ceramic Substrate	Al <sub>2</sub> O <sub>3</sub>
(b)	Inner Electrode	Ag
(c)	Resistor	RuO <sub>2</sub>
(d)	Glass Coat	Bi <sub>2</sub> O <sub>3</sub> , SiO <sub>2</sub>
(e)	Protective Coat	Polymer / Glass
(f)	Terminal Coat	Ni-Cr Alloy /Ag
(g)	Ni Plate	Ni
(h)	Sn Plate	Sn

## Feature

- Very small, thin, and light weight.
- Both flow and reflow soldering are applicable.
- Very low inductance.
- Suitable size and packaging for surface mount assembly.
- Lead-free terminal.
- PbO(lead oxide) is included in the glass of our product which is prescribed on RoHS appendix as an exemption.

## Application

- General purpose.
- Home Appliances.  
(DVD, Digital TV, Digital Camera, Audio, Tunner).
- For Computers & Communications.  
(Notebook, Memory Module, Mobile, Network Equipment, etc).

## Power Derating Curve

The rated power is the maximum continuous loading power at 70°C ambient temperature.

For ambient temperature above 70°C, the loading power follows the below power derating curve.

## Jumper Rating

Type	Size (inch)	Rated Current (A)	Resistance (Ω)
RC0402	01005	0.5	0.05 Max
RC0603	0201		
RC1005	0402	1.0	
RC1608	0603		
RC2012	0805	2.0	
RC3216	1206		
RC3225	1210		
RC5025	2010		
RC6432	2512		

## Marking

### • 3 digits indication (E-24 series)

- Left 2 digits represent significant figures.
- Last 1 digit represents exponential number of 10.

- Example: **103**  
Left 2 digits: 10  
Last 1 digit: 3  
 $103 = 10 \times 10^3 \Omega$   
 $= 10000 \Omega = 10k\Omega$

### • 4 digits indication (E-96 series)

- Left 3 digits represent significant figures.
- Last 1 digit represents exponential number of 10.

- Example: **1002**  
Left 3 digits: 100  
Last 1 digit: 2  
 $1002 = 100 \times 10^2 \Omega$   
 $= 10000 \Omega = 10k\Omega$

No marking types :  
RC0402, RC0603,  
RC1005

No marking types :  
RC0402, RC0603,  
RC1005, RC1608

## Power Derating Curve

The rated power is the maximum continuous loading power at 70°C ambient temperature.  
For ambient temperature above 70°C, the loading power follows the below power derating curve.

## Marking

### 4 digits indication

- R means decimal point.
- Other digits represent the significant value.
- Example : R100  
 $R100 = .100 = 0.100\Omega$   
 $= 0.1\Omega$  or  $100m\Omega$

## Feature

- Reducing SMD surface area (40% reduced).
- Reducing SMD costs (75% reduced).
- Both flow and reflow soldering are applicable.

The product of lead-free terminal is RoHS compliant. PbO(lead oxide) is included in the glass of our product which is prescribed on RoHS appendix as an exception.

## Application

- For semiconductor devices.
- For computers, digital circuits.

## Feature

- Strong Body.
- Both flow and reflow soldering are applicable.
- Concave Type Terminal.

The product of lead-free terminal is RoHS compliant.  
PbO(lead oxide) is included in the glass of our product which is prescribed on RoHS appendix as an exception.

## Application

- For semiconductor devices.
- For computers, digital circuits.

## Feature

- Stable in the Sulfur Atmosphere.
- ASTM Satisfied
- Passed 720hrs with the dried Sulfur at 105°C.
- High Precision Reliability.
- RoHS Compliant.

## Application

- Electronic Devices with long-term reliability.
- Server System (Memory Module / HDD).
- Network Equipment.
- Automotive ECU parts

## Feature

- The RP10AT is small-size chip Attenuator, suitable for high density surface mounting.
- Unbalanced  $\pi$  type attenuator circuit in one chip(1.0 mm x 1.0 mm).
- Mounting occupation area reduction : about 50 % reduction.
- Mounting cost reduction : Mounting times 3 times  $\rightarrow$  1 time.
- Attenuation : 0 dB to 10 dB.

## Application

- Attenuation / level control / impedance matching of high frequency signals of communication equipment; cellular phones(GSM, CDMA, etc.), PHS, PDA, for example.

## Electrical Characteristic

Item	Requirements Specification		Test Methods	
	Resistor	Jumper	Resistor	Jumper
Direct Current Resistance	Within the regulated resistance tolerance.	50mΩ Max.	JIS C 5201-1 4.5 Voltage apply Within 5 sec. Test temp: 20 °C, 65RH Test board: <FIG. 1>	
Temperature Characteristic	1Ω ≤ R < 10Ω : ±300ppm/°C 10Ω ≤ R ≤ 10MΩ : ±100ppm/°C (0201 size : ±250ppm/°C)		JIS C 5201-1 4.8 Test Temperature(°C) 20 °C → -55 °C / 20 °C → 125 °C T.C.R(ppm / °C)=(R-R20) / R20 × 1/(T-T20) × 10 <sup>6</sup> ※ T=test Temperature, T20 =20 °C R=Resistance at T, R20 =Resistane at T20 Test board: <FIG. 1>	
Short-time Overload	ΔR	Less than ±(1% ± 0.1Ω) of the initial value.	JIS C 5201-1 4.13 Apply 2.5 times rated voltage for 5 sec. Wait 60 minutes at room temperature. Measure the resistance value. Test board: <FIG. 1>	Max Surge Current
	Visual	No evidence of mechanical damage.		
Intermittent Overload	ΔR	Less than ±(3% ± 0.1Ω) of the initial value.	JIS C 5201-1 4.13 2.5 times of rated voltage . 1 second ON, 25 second OFF. 10,000 cycles. Test board: <FIG. 1>	Max Surge Current
	Visual	No evidence of mechanical damage.		
Dielectric Withstanding Voltage	No evidence of mechanical damage.		JIS C 5201-1 4.7 Apply Voltage for 1 minute 0402.0603:50V 1005, 1608: 100V Other: 500V	
Insulation Resistance	Over 1,000MΩ			

## Mechanical Characteristic

Item	Requirements Specification		Test Methods	
	Resistor	Jumper	Resistor	Jumper
Solderability	Coverage: ≥95% each termination. No crack of termination parts and ceramic exposure of surface by melting.		IEC60068-2-58 Rosin Flux: Rosin 25%, Methanol 75% Solder Temp.: 245±5/-0 °C Dipping time: 2±0.5 sec.(Both side dipping)	
Bending Test	ΔR	Less than ±(1.0% ± 0.05Ω) of the initial value.	JIS C 5201-1 4.33 After soldering resistor on the PCB, 3mm of bending shall be applied for 10 sec. Test board: <FIG. 2>	
	Visual	No evidence of mechanical damage.		
Adhesive strength of termination	·No mechanical damage or sign of disconnection		JIS C 5201-1(4.16) - Test strength : 5N (500g · f), 0603 : 2N - Test time : Applying pressure for 10 seconds	
Resistance to Soldering Heat	ΔR	Less than ±(1% ± 0.05Ω) of the initial value.	JIS C 5201-1 4.18 - Flow soldering : 260±5 °C, 10 sec. max.(both side dipping) - Reflow soldering : 260±5 °C, 10 sec. max. over 230 °C, 30~40 sec.	
	Visual	No evidence of mechanical damage.		
Anti-Vibration Test	ΔR	Less than ±(1% ± 0.05Ω) of the initial value.	JIS C 5201-1 4.22 2 hours each in X, Y and Z axis(total 6 hours) 10 to 55Hz sweep in 1 minute at 1.5mm amplitude.	
	Visual	No evidence of mechanical damage.		

## Environmental Characteristic

Item	Requirements Specification		Test Methods	
	Resistor	Jumper	Resistor	Jumper
Temperature Cycle	ΔR	Less than $\pm(1\% \pm 0.1\Omega)$ of the initial value.	50mΩ Max.	JIS C 5201-1 4.19 Perform 100 cycles as follows. Test Condition: -55°C / 30min ↔ 125°C / 30min sweep time: 5 min Test board: <FIG. 1>
	Visual	No evidence of mechanical damage.		
Load Life	ΔR	Less than $\pm(3\% \pm 0.1\Omega)$ of the initial value.	50mΩ Max.	JIS C 5201-1 4.25 Test Voltage: rated voltage Test temp.: 70±2°C Time: 1,000 <sup>+48</sup> hours(90 min; ON, 30 min; OFF) Test board: <FIG. 1>
	Visual	No evidence of mechanical damage.		
Low Temp. Exposure	ΔR	Less than $\pm(3\% \pm 0.1\Omega)$ of the initial value.	50mΩ Max.	JIS C 5201-1 4.23 Dwell in -55°C chamber without loading for 1,000 <sup>+48</sup> hours. Stabilize for 60 minutes at room temperature. Measure value. Test board: <FIG. 1>
	Visual	No evidence of mechanical damage.		
High Temp. Exposure	ΔR	Less than $\pm(3\% \pm 0.1\Omega)$ of the initial value.	50mΩ Max.	JIS C 5201-1 4.23 Dwell in 125°C ±2°C or 155°C ±2°C chamber without loading for 1,000 <sup>+48</sup> hours. Stabilize for 60 minutes at room temperature. Measure value. Test board: <FIG. 1>
	Visual	No evidence of mechanical damage.		
Moisture Resistance	ΔR	Less than $\pm(3\% \pm 0.1\Omega)$ of the initial value.	50mΩ Max.	JIS C 5201-1 4.14 Test Voltage: rated voltage Test temp.: 40±2°C Time: 1,000 <sup>+48</sup> hours(90 min; ON, 30 min; OFF) Humidity: 90~95% RH Stabilize for 1 hrs & Measure. Test board: <FIG. 1>
	Visual	No evidence of mechanical damage.		

\* These characteristics apply to 1Ω ~10MΩ . In case of other resistance range, please contact us.

\* The next is specification in our company for flow soldering and test boards.

## Flow soldering Conditions

Item	Specification	Dipping
Flux	ROSIN 25%, IPA 75%	Time: 5~10 sec.
Solder	Sn-3.0Ag-0.5Cu	Time: 10 sec max. Temp.: 260±5°C.

1. This catalogue is valid only to the products purchased either from us or through our official distributors.
2. Product specifications included in this catalogue are effective as of May 1, 2015.  
Please be advised that they are standard product specifications for reference only.  
We may change, modify or discontinue the product specifications without notice at any time.  
So, you need to approve the product specifications before placing an order. Should you have any question regarding our product specifications, please contact our sales personnel or application engineers.
3. We may modify or cease to produce the products listed in this catalogue without notice. Should you have any question, please contact our sales personnel or application engineers.
4. Without obtaining our permission, you should not be allowed to reproduce, copy, use or transfer any content or information contained this catalogue in any manner whatsoever for any purpose.
5. In no event, will we be responsible for any claim, dispute, damage or liability whatsoever arising from, relating to or in connection with your misuse of the products or/and information included in this catalogue.  
We will also not assume any responsibilities whatsoever for any claim, dispute, damage or liability with regards to the intellectual property rights or other related rights of ours or any third party associated with your use of our products and/or information contained in this catalogue. We expressly disclaim that no license is granted regarding the aforementioned rights.
6. Please note that the products in this catalogue are not designed or intended to use for the applications set forth below. So, if you intend to use the products in this catalogue for the applications listed below, you should contact our sales personnel or application engineers before using.  
Please be aware that any misuse of the products deviating from product specifications or information provided in this catalogue may cause a serious property damage or a personal injury.
  - ① Aerospace/Aviation equipment
  - ② Transportation equipment (vehicles, trains, ships, etc)
  - ③ Medical equipment
  - ④ Military equipment
  - ⑤ Disaster prevention/crime prevention equipment
  - ⑥ Any other applications with the same as or similar complexity or reliability to the applications set forth above.

## Passive components sales offices

### • Head office

206, Cheomdansaneop Road,  
Yeongtong-gu, Suwon-city,  
Gyeonggi province, Korea,  
443 - 743

#### Europe

Tel: + 82 - 31 - 210 - 6328  
E-mail:james.pyun@samsung.com

#### America

Tel: + 82 - 31 - 210 - 6803  
E-mail:wesley.rohi@samsung.com

#### Asia

Tel: + 82 - 31 - 210 - 6791  
E-mail:peter\_kim@samsung.com

#### Domestic

Tel: + 82 - 31 - 210 - 5074  
E-mail:boungho.leel@samsung.com

### • Manufacturing sites

#### Suwon Plant (Korea)

206, Cheomdansaneop Road,  
Yeongtong - gu, Suwon-city,  
Gyeonggi province, Korea  
443 - 743  
Tel: + 82 - 31 - 210 - 5074  
E-mail:boungho.leel@samsung.com

#### Busan Plant (Korea)

1623 - 2, Songjeong - dong,  
Gangseo - gu, Busan, Korea,  
618 - 270  
Tel: + 82 - 51 - 970 - 7671  
E-mail:kyc.kweoni@samsung.com

#### Tianjin Plant (China)

27, Heiniucheng - Road, Hexi District,  
Tianjin, 300210 China  
Tel: +86 - 22 - 2397 - 9000(310)  
E-mail:moohantop.Park@samsung.com

#### High Tech (China)

Xiqing Dist. Micro - Electronics  
Industrial Park, Jingang Highway,  
Tianjin, China 300385  
Tel:+ 86 - 22 - 2397 - 9000(3143)  
E-mail:enhao.song@samsung.com

#### Binhai Plant(China)

80, Xiaqing Road, West area of  
BinHai development zone,  
TianJin, 300458, China  
Tel:+ 86 - 22 - 6686 - 3333(1300)  
E-mail:sk1000.kim@samsung.com

### Philippines Plant (Philippines)

Block No.5, Calamba Premiere  
International Park, Batino, Calamba,  
Laguna, Manila, Philippines 4027  
Tel: + 63 - 49 - 545 - 0422  
E-mail:donna@samsung.com

### • Asia sales offices

#### Shenzhen Office

46 F, New World Center,  
Yitian Road, Futian District,  
Shenzhen, 518026 China  
Tel: 86 - 755 - 8608 - 5571  
E-mail:jackson.xian@samsung.com

#### Shanghai Office

Rm. 1211, Shanghai International  
Trade Center, No. 2201 Yan an (W) Rd.,  
Shanghai, 200335 China  
Tel: 86 - 21 - 6270 - 4168(274)  
E-mail:dennis.cha@samsung.com

#### HongKong Office

8/F., Central Plaza, 18 Harbour Road,  
Wanchai, Hongkong, China  
Tel:852 - 28626344  
E-mail:vivianchan@samsung.com

#### Qingdao Office

Rm 1201, Growne Plaza Qingdao 76,  
Xiang Gang Zhong Rd, Qingdao,  
266071 China  
Tel:86 - 85779102  
E-mail:zhengguo.cui@samsung.com

#### Taiwan Office

9F - 1, Np. 399 Ruey Kuang Rd., Neihu  
District, Taipei City, Taiwan, 114  
Tel:886 - 2656 - 8356  
E-mail:kevin0130.wang@samsung.com

#### Singapore Office

3 Church Street Samsung Hub,  
#23 - 02 Singapore 049483  
Tel:65 - 6833 - 3228  
E-mail:winson.yeong@samsung.com

#### Bangkok Office

23rd Floor, Lake Rajada Office Complex  
193/89 Rachadapisek Road,  
Khet Klongtoey, Bangkok 10110, Thailand  
Tel:66 - 2 - 661 - 8004 ~ 5  
E-mail:yangshin.yi@samsung.com

### • America sales office

#### Irvine Office

3333 Michelson Drive,  
Suite 500, Irvine, CA 92612, USA  
Tel: 1 - 949 - 797 - 8016  
E-mail: andrew.skelly@samsung.com

### • Europe sales offices

#### Frankfurt Office

Samsung Haus, Am Kronberger Hang 6,  
D-65824 Schwalbach/Ts. Germany  
Tel: 49 - 6196 - 66 - 7255  
E-mail:frank.goebel@samsung.com

#### Hungary Office

H-2310, Leshegy utca 2-4,  
Szigetszentmiklos, Pest megye, Hungary  
Tel: 36 - 24 - 551 - 148  
E-mail:jun21c.leel@samsung.com

### • Domestic Distributors

#### Korchip Corporation

817 - 38, Anyang 2 - dong, Manan - gu,  
Anyang-city, Gyeonggi province,  
Korea, 430-812  
Tel: + 82 - 31 - 361 - 8100  
E-mail:itasapl@korchip.com

#### SAMT

Daekyung Bldg., 983 - 10, Daechi - dong,  
Gangnam - gu, Seoul, Korea
