Keys are used for keying plug-in assemblies such as
front panels and prevents them from being used in
incorrect slots. These keys are installed into the front
chambers of VectorPak™ CG3-160 or CG3-220 card
guides and matched with an offsetting key inserted into
type IV injector/ejector handles. By keying upper and
lower card guides, over 4,000 combinations are possi-
ble. Available in packs of 25 in red or grey (RAL 7032).
