# PLED Open LED Protectors PLED5 QFN Series

# RoHS

# **PLED5 QFN Series**

### **Schematic Symbol**

# **Description**

This PLED5 Open LED Protector device provides three methods for increasing the reliability of LED lighting:

- If one of the LEDs in an array fails open, this device provides a substitute electronic path so that the array continues to function
- 2) It protects against ESD events up to  $\pm$  8 kV for contact discharges and  $\pm$  15 kV for air discharges per the IEC 61000-4-2 electrostatic immunity standard.
- 3) It provides protection in the case of accidental reverse battery or power connection.

High reliability of lighting functions such as traffic lighting, aircraft lighting, advertising lighting, and runway lighting demand the use of a device such as the PLED5.

Littelfuse offers over current devices for implementation in power circuits that can also enhance the reliability of circuit operation. Our full line of circuit protection products can be viewed at www.littelfuse.com.

### **Features & Benefits**

- Reverse Battery/Power Protection
- ESD, IEC 61000-4-2, ±8kV contact, ±15 kV air
- Open LED bypass up to 500 mA
- Fast Switching
- Resets After Power Cycle
- Low Turn-On (Trigger Voltage)
- Ideal for MR16, PAR type lamps
