100 W Multi Range 60 V / 5 A DC Power Supply  
Model 9110

The 9110 is a new type of power supply. Unlike conventional power supplies with fixed output ratings, the 9110 automatically recalculates voltage/current limits for each setting. The 9110 provides 100 W output power in any Volt/Amp combination within the rated voltage (60 V) and current (5 A) limits. By providing greatly expanded choices of maximum power Volt/Amp combinations, users can cut down on the number of power supplies required and free up valuable bench space.

Example:  
When setting the voltage to the maximum of 60V, the maximum current value is  $100\text{ W}/60\text{ V} = 1.66\text{ A}$ . For a 20V setting, the maximum current is 5 A. Maximum output power of 100 W is possible for all Volt/Amp combinations that lie on the hyperbolic curve.
