

FS12-1600-C2

Description:

The FS12-1600-C2 is a dual primary and dual secondary, split bobbin design which operates with either a parallel input of 115V or a series input of 230V. The output voltage will be either 12.6V with a center-tap under a 1.6A load with the secondaries wired in series, or 6.3V under a 3.2A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
