

2mm Pitch, Multi functional Connector System. (Floating [Board-to-Board], Swing-Lock [Wire-to-Board], Short Pin)

DF59 Series

■ Features

1. Floating Structure (Board-to-Board)

The Board-to-Board connector can be used to connect multiple boards together in a co-planar arrangement and features a “Stress free contact” that floats $\pm 0.5\text{mm}$ in the X, Y and Z dimensions.

2. Swing Lock Structure (Wire-to-Board)

The DF59 features a “swing-lock” mechanism that employs both a positive and friction lock. This helps to prevent the cable assembly from unmating by severe wiring and mechanical stress.

3. Short-Circuit Pin Connector

The Short-Circuit Pin connector allows the termination of an open circuit. Typically used at the end of a series of connected circuit boards.

4. Multi Function Design

The DF59 has the ability to function as either a Board-to-Wire or Board-to-Board System. The PCB mounted receptacle is designed to mate with the B-to-W, B-to-B, and Short Circuit Pin connectors. This multi function ability allows versatility while keeping connectors to a minimum.

5. Performance and Space Savings

The DF59 series offers high performance in a compact, space saving design; featuring a 2mm pitch and coupled with a mated height of only 2.48mm with AWG#22 cable. The single position floating plugs DF59S and DF59SN are specifically designed to save space, and can be mounted in high density applications.

6. Contact Design

The terminal design features two points contact to ensure a highly reliable connection.

7. High Operating Temperature

DF59's are rated at temperatures up to 105 °C.

8. Common Applicator

Crimping can be performed using the applicator (AP105-DF11-22S) for the existing series DF11-22S C F(A), by replacing the die with the one for DF59 series.

* For crimping quality standards and crimping conditions, crimping needs to be performed in accordance with the specific conditions of DF59-22PCFA.

◆ Floating Structure in Three Axial Directions (Board-to-Board Structure)

DF59 floating amount $\pm 0.5\text{mm}$ (X, Y, Z directions)

DF59S/SN floating amount

$\pm 0.5\text{mm}$ (X, Y direction), $\pm 0.2\text{mm}$ (Z direction)

| <p>6. Precautions</p> | <ul style="list-style-type: none"> ■ When inserting crimp-type (solderless) terminals to crimping (solderless) sockets, to maintain reliable performance, please do not insert obliquely. ■ DO NOT mate/un-mate a non-terminated plug with a non-mounted receptacles. This may lead to damage or deformation of the contacts. ■ Please note that pulling on the wires or cable during un-mating may cause damage. ■ DO NOT apply flux to the contact terminals when hand soldering the receptacle to the board. Flux can wick into the electrical contact areas and may lead to connection failures. ■ Slight discoloration on the insulating materials will not affect form, fit or function of the connectors. ■ For operating suggestions on insertion and removal, please refer to the "DF59 Insertion and Removal Manual", "DF59S Insertion and Removal Manual", "DF59SN Insertion and Removal Manual" ■ Please refer to the documents "Cable assembly procedure", "Crimp condition" and "Crimp quality standard" for the cable assembly procedures. |
