TECHNICAL DATASHEET

MDS Medical AC-DC Adapter

24Volt, 60Watt / MDS-060AAS24 B

060AAS24 B

Highlights & Features

- Safety Approvals to IEC 60601-1 3rd ed. & IEC 60950-1
- Risk management report available
- Low touch current (<0.1mA Normal & ,0.3mA single fault)
- Over-Voltage/Load/Temperature & Short Circuit protections
- 1 Million Hours MTBF
- 2 x MOPP (means of patient protection)
- 3 years warranty

Safety Standards

E356265

CB Certified for worldwide use

Model Number: MDS-060AAS24 B
Unit Weight: 360 grams (12.7 ounces)
Dimensions (W x L x H): 62.0x135.0x34.1 mm
2.4x5.3x1.3 in

General Description

The MDS series of external power supply comes with universal AC input at 90Vac to 275Vac. Other features include low earth leakage, risk management report available and the electric shock protection comply with 2 x MOPP. The MDS series is certified for EMC standards according to EN 55011 for industrial, scientific and medical (ISM) radio-frequency equipment and EN 55022 for Information Technology Equipment (ITE) radio-frequency equipment. In addition, only recognized Japanese capacitors are used.

The MDS series come with both medical and ITE safety approvals including UL/cUL/CCC/CE and CB certification and are fully compliant with RoHS Directive 2011/65/EU for environmental protection.

Model Information

Medical AC-DC Adapter

Model Number	Input Voltage Range	Output Voltage	Output Current
MDS-060AAS24 B	90-275Vac	24Vdc	2.5A

Model Numbering

MDS	-	060	AAS	24	B
Delta Medical power Supply		Max wattage in the product series. Maybe lower at some voltage. 060 → 60W	Family Code	Output Voltage Single Output: 24 for 24V	

All parameters are specified at 25°C ambient unless otherwise noted.

MDS Medical AC-DC Adapter
24Volt, 60Watt / MDS-060AAS24 B

Specifications

Input Ratings / Characteristics

Nominal Input Voltage	100-250Vac
Input Voltage Range	90-275Vac
Nominal Input Frequency	50-60Hz
Input Frequency Range	47-63Hz
Input Current (max)	1.5A @ 115Vac, 0.75A @ 230Vac
Efficiency (typ.)	88.3%, Reference Fig.1
Standby Power (max)	0.3W
Inrush Current (typ.)	50A @ 115Vac, 100A @ 230Vac
Earth Leakage Current (max)	0.1mA @ 275Vac NC[1)], 0.3mA @ 275Vac SFC[2)]

1) NC: normal condition
2) SFC: single fault condition

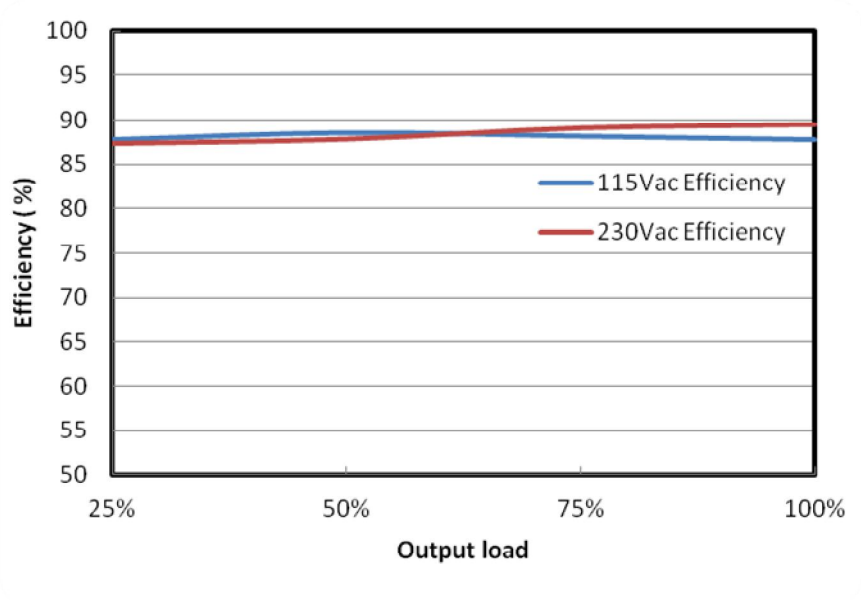

Fig.1 Efficiency versus output load

Output Ratings / Characteristics

Nominal Output Voltage	24Vdc
Output Voltage Tolerance	± 5%
Output Current	2.5A
Output Power	60W
Line Regulation (max)	±0.5%
Load Regulation (max)	±5%
Ripple & Noise (typ.)	43mV pk-pk @ Full load, Reference Fig. 2
Start-up Time (max)	3000ms @ 115Vac
Hold-up Time (min)	10ms @ 115Vac
Dynamic Response (Overshoot & Undershoot O/P Voltage)	± 5% @ 50-100% load

*Periodic and Random Deviation

Mechanical

Case Chassis		PC
Case Cover		PC
Dimensions(W x L x H)		62.0 x 135.0 x 34.1 mm(2.4x5.3x1.3 in)
Unit Weight		360 grams (12.7 ounces)
Indicator		NA
Terminal	Input	C14 socket
	Output	4pin Din / Barrel type / Tuning fork type

Environment

Surrounding Air Temperature	Operating	0°C to +40°C
	Storage	-40°C to +85°C
Operating Humidity		10-95% RH (Non-Condensing)
Operating Altitude		3,000 meters
Shock Test (Non-Operating)		50G, 11ms, 3 shocks for each direction
Vibration (Operating)		5-500Hz, 2.09Grms, 20 minute for each three axis

MDS Medical AC-DC Adapter
24Volt, 60Watt / MDS-060AAS24 B

Protections

Overvoltage (max)	150%, Latch Mode
Over load / Over current (max)	180% of rated load current, Hiccup Mode, (Non-Latching, Auto-Recovery)
Over Temperature	Hiccup Mode, (Non-Latching, Auto-Recovery)
Short Circuit	Hiccup Mode, (Non-Latching, Auto-Recovery)
Degree of Protection	IP40
Protection Against Shock	Class I

Reliability Data

MTBF (typ.)	1 million Hours based on Telecordia SR-332

Safety Standards / Directives

Medical Safety		IEC60601-1: (Ed.3,2005), EN60601-1:2006, CAN/CSA-C22.2 No. 60601-1:08, ANSI/AAMI ES60601-1: (Ed.3,2005)
ITE Safety		IEC60950-1 (Ed.2,2005), GB4943.1-2011, GB9254-2008, GB17625.1-2003
CE		MDD Directive 93/42/EEC
Material and Parts		RoHS Directive 2011/65/EU Compliant
Galvanic Isolation	Input to Output	4000 Vac
	Input to Ground	1500 Vac
	Output to Ground	500 Vac

Functions

Start-up Time

The time required for the output voltage (Vo) to reach 90% of its set value, after the input AC voltage is applied.

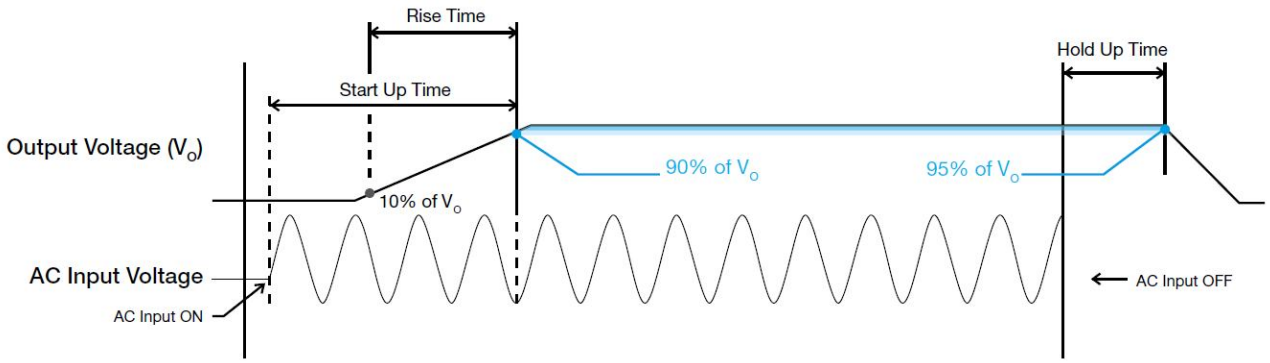
Rise Time

The time required for the output voltage (Vo) to change from 10% to 90% of its steady state value.

Hold-up Time

Hold up time is the time when the AC input collapses and output voltage retains regulation for a certain period of time. The time required for the output to reach 95% of its set value, after the input voltage is removed.

■ **Graph illustrating the Start-up Time, Rise Time, and Hold-up Time**



All parameters are specified at 25°C ambient unless otherwise noted.

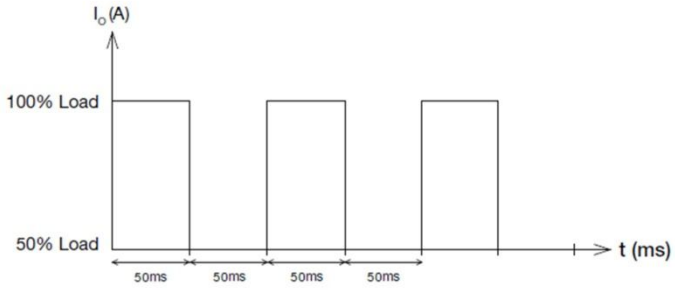
MDS Medical AC-DC Adapter
24Volt, 60Watt / MDS-060AAS24 B

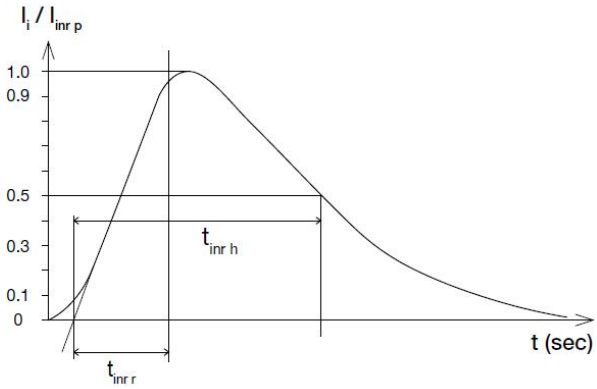
Dynamic Response

The power supply output voltage will remain within ±3% of its steady state value, when subjected to a dynamic load change from 50 to 100% of its rated current.



Inrush Current

Inrush current is the input current that occurs when the input voltage is first applied. For AC input voltages, the maximum peak value of inrush current will occur during the first half cycle of the applied AC voltage. This peak value decreases exponentially during subsequent cycles of AC voltage.



Overvoltage Protection

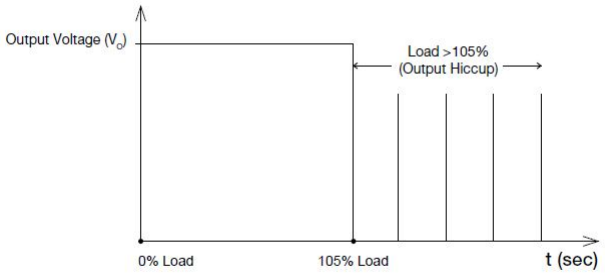
The power supply's overvoltage circuit will be activated when its internal feedback circuit fails. The output voltage shall not exceed its specifications defined on Page 3 under "Protections". Power supply will hiccup mode, and require removal/re-application of input AC voltage in order to restart.

Short Circuit Protection

The power supply's output OLP/OCP function also provides protection against short circuits. When a short circuit is applied, the output current will operate in "Hiccup mode", as shown in the illustration in the OLP/OCP section on this page. The power supply will return to normal operation after the short circuit is removed.

Overload & Over current Protections

The power supply's Overload (OLP) and Over current (OCP) Protections will be activated when output current is between 110% and 130% of I_O (Max load). Upon such an occurrence, V_O will start to drop. Once the power supply has reached its maximum power limit, the protection will be activated. and the power supply will go into "Hiccup mode" (Auto-Recovery). The power supply will recover once the fault condition causing the OLP and OCP is removed and I_O is back within the specified limit.



Additionally, if the I_O is <130% but >110% for a prolong period of time (depending on the load), the Over Temperature Protection (OTP) will be activated due to high temperature on critical components. The power supply will then go into hiccup mode until the fault is removed; and, the input voltage is removed, then reapplied.

Over Temperature Protection

As mentioned above, the power supply also has Over Temperature Protection (OTP). This is activated when the overload condition persists for an extended duration and the output current is below the overload trigger point but >100% load. In the event of a higher operating condition at 100% load, the power supply will run into OTP when the surrounding air temperature is higher than the operating temperature. When activated, the output voltage will go into hiccup mode until the input voltage is removed; then, reapplied, and the surrounding air temperature drops to its normal operating temperature.

24Volt, 60Watt / MDS-060AAS24 B

Certificate

All Delta Medical Power products conform to the European directive 2011/65/EU. RoHS is the abbreviation for “Restriction of the use of certain hazardous substances

Delta has been certified as meeting the requirement of ISO 13485: 2003 and EN ISO 13485:2012 for the design and manufacture of switching power supply and adaptor for medical device.

Delta is approved for the UL Total Certification Program (TCP) approved client laboratory for IEC62368-1. Delta also has participated UL Client Test Data Program (CTDP) for IEC 60601
