Product Highlights

SEARAY Slim is a solution armed with the benefits of the standard SEARAY family but with a width similar to 2 row mezzanine products. The design gives a system a highly compact solution but with speed capabilities of 12.5 Gbps, a level of performance most other 2 row products cannot achieve today. As system level speeds approach 5Gbps and beyond, SEARAY is an enticing mezzanine architecture that provides headroom for future generation iterations as protocol speeds continue to increase.

Features and Benefits

- Narrow body width comparable to 2 row SMT has a minimal PCB footprint for high density board designs
- Data rates up to 12.5Gbps provide excellent signal clarity and large bandwidth
- Robust contact design prevents stubbing and damage in mating interface

Applications

- Mezzanine add-on cards
- Memory expansion
- I/O expansion
- Controller cards
- Motherboard personality cards
