

HD-SDI Adapter

The HD-SDI (High-Definition - Serial Digital Interface) adaptors enable the Digital View SVH-1920 LCD controller card to support single or dual HD-SDI connections, thus providing a highly featured alternative to expensive HD-SDI monitors or external adaptor devices.

Capable of driving high definition video data over long cable distances HD-SDI applications are growing to include Digital Signage; Video Cameras; Digital Audio and/or video recording/play back devices; Digital Set top boxes; Video projectors; High definition video systems; Medical video; Multi-media PC applications etc.

The adaptor is design to sit side-by-side with the SVH-1920 using a parallel ribbon cable to maintain the low profile required of today's professional class LCD monitors.

Fully compliant with the SMPTE 259M and ITU 656 16 bit 4:2:2 standards, the adaptors feature LED indicators for channel status and the dual channel version provides menu or hot-key switching between the inputs.
