1.0 Introduction

The Trinity MIMO antenna is a powerful 3*3 3dBi External 2.4GHz omni-directional antenna to enable high-speed data throughput. 3 individual high-gain elements ensure maximum coverage through diversity. Desk-top placement, magnet-mounting, wall-mounting, adhesive mounting are all options. The individual antennas can articulate horizontally and vertically for best signal reception depending on mounting conditions. The cables are shipped bonded together for easy cable management. The standard connector option of RP-SMA plugs into AP router equipment. Other cable and connector options are available on request.
