

## F24-800

### Description:

The F24-800 is a single primary and dual secondary, split bobbin design which operates with an input of 115V. The output voltage will be either 24.0V with a center-tap under a 0.8A load with the secondaries wired in series, or 12.0V under a 1.6A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
