

## TISP4070J3BJ THRU TISP4395J3BJ

### BIDIRECTIONAL THYRISTOR OVERVOLTAGE PROTECTORS

## TISP4xxxJ3BJ Overvoltage Protector Series

#### Ion-Implanted Breakdown Region

- Precise and Stable Voltage
- Low Voltage Overshoot Under Surge

#### Designed for Transformer Center Tap (Ground Return)

##### Overvoltage Protection

- Enables GR-1089-CORE Compliance
- High Holding Current Allows Protection of Data Lines with d.c. Power Feed

Can be Used to Protect Rugged Modems Designed for Exposed Applications Exceeding TIA-968-A

#### Description

The range of TISP4xxxJ3BJ devices are designed to limit overvoltages on telecom lines. The TISP4xxxJ3BJ is primarily designed to address GR-1089-CORE compliance on data transmission lines with d.c. power feeding. When overvoltage protection is applied to transformer coupled lines from the transformer center tap to ground, the total ground return current can be 200 A, 10/1000 and 1000 A, 2/10. The high 150 mA holding current is set above common d.c. feed system levels to allow the TISP4xxxJ3BJ to reset following a disturbance.

These devices allow signal voltages, without clipping, up to the maximum off-state voltage value,  $V_{DRM}$ , see Figure 1. Voltages above  $V_{DRM}$  are limited and will not exceed the breakover voltage,  $V_{(BO)}$ , level. If sufficient current flows due to the overvoltage, the device switches into a low voltage on-state condition, which diverts the current from the overvoltage through the device. When the diverted current falls below the holding current,  $I_H$ , level the devices switches off and restores normal system operation.

#### How to Order

| Device       | Package        | Carrier              | Order As        | Marking Code | Std. Qty. |
|--------------|----------------|----------------------|-----------------|--------------|-----------|
| TISP4xxxJ3BJ | SMB (DO-214AA) | Embossed Tape Reeled | TISP4xxxJ3BJR-S | 4xxxJ3       | 3000      |

Insert xxx value corresponding to device name.

NOTES: 1. Initially the device must be in thermal equilibrium with  $T_J = 25^\circ\text{C}$ .

2. These non-repetitive rated currents are peak values of either polarity. The surge may be repeated after the device returns to its initial conditions.

## Electrical Characteristics, $T_A = 25^\circ\text{C}$ (Unless Otherwise Noted)
